# SHIREF MOHAMMED

MERN Stack Developer

ABOUT ME

Hi! I'm Shiref, a computer science student with 2 years of frontend development experience. Over the last year, I've also dived into Node.js backend development, becoming a proficient MERN stack developer.

Seeking roles as a junior backend developer and no problem to work as fullstack MERN developer.

As of June 15, 2024, I am available for full-time employment and eager to contribute effectively to any team or project.

Thank you for your consideration.

EDUCATION

High School   started at 2022

Faculty of Computer Science

EXPERIENCE & SKILLS

Frontend Development skills:

- Proficient in HTML, CSS, JavaScript, React, and Redux, with extensive experience in creating user-friendly and responsive web applications.
- Intermediate proficiency in Bootstrap, Tailwind CSS, and TypeScript, enhancing the design and functionality of web projects.
- Demonstrated expertise in Git version control and GitHub, ensuring efficient collaboration and code management.
- 1 year of hands-on experience in Node.js, Express, and MongoDB, contributing to the development of backend systems and APIs.
- Currently preparing to expand skills in technologies such as Next.js, Sass, and other emerging technologies.
- Visit my website and GitHub profile to explore a diverse range of projects showcasing fullstack MERN applications,and seamless integration of frontend and backend technologies.

Computer Science Fundamentals:

- Proficient in C# and Object-Oriented Programming (OOP).
- Familiar with data structures and algorithms (arrays, linked lists, stacks, queues, trees, graph), including understanding of time complexity and searching/sorting techniques.
- Completed coursework in Operating Systems, Databases, SQL, Network Architecture, and Data Communication.
- Regularly practice problem-solving.
- Proficient in conducting online research.
- Basic understanding of computer systems, CPU functioning, and internet architecture.
- Strong background in mathematics.
- Continuously learning about system design, architecture, and other academic Computer Science topics.

MY LATEST PROJECTS

- **YOUTUBE_CLONE Full-stack Website Made by MERN Stack Technology.**
  Features:
  📄 *It has Authentication, Home, Explore, Trending, Subscriptions, Create Video,*
  Update Video, Show Video, Profile, Update Profile, Settings, Admin Dashboard,
  Search, and Notifications Pages.
  🔒 *Secure Registration, Login, Password Recovery, and Email Verifications.*
  💬 *Receive real-time notifications for a seamless experience.*
  🚀 *Achieving accessibility, speed, and safety.*
  📈 *Plus, other amazing features, controllers, and relationships that you will discover*
  when visiting the GitHub repository.

- **INSTAGRAM_CLONE Full-stack Website Made by MERN Stack Technology.**
  Features:
  📄 *It has Authentication, Home, Explore, Create Post, Update Post, View Post, Search*
  Profile, Update Profile, Settings, Admin Dashboard and Real-Time Chat Pages.
  🔒 *Secure Registration, Login no Password Recovery, and no Email Verifications.*
  💬 *Real-time Chat using socket io.*
  🚀 *Achieving accessibility, speed, and safety.*
  📈 *Plus, other amazing features, controllers, and relationships that you will discover*
  when visiting the GitHub repository.

- **RECIPE_SOCIAL_MEDIA_APP Full-stack Website Made by MERN Stack Technology.**
  Features: It is the first MERN App I made which I implemented GRUD operations.
  It social media app which you can share recipes like posts. also It has
  authentication future and other functions which you can explore by
  visiting the GitHub repository.

- **FITNESS_GYM UI Page Made by React.**
  Features: It is a simple react UIpage I implemented from youtube when learning.

- **RESTAURANT UI Page Made by HTML, CSS, JS.**
  Features: It is a simple UI page I implemented to test my skills in JS.

- **ANIMATED_PORTFOLIO UI Page Made by HTML, CSS, JS.**
  Features: It is a simple UI page I implemented from youtube when learning.

- **MY_PORTFOLIO Made by React.**
